

WorldAddress™ Country Coverage

WorldAddress covers most of the world with address data from over 250 countries included. The level of data available varies from country to country as not all countries have data to full property (or delivery point) level.

[your address and data quality partners](#)

Countries with Property Level Data:

Can identify the actual house or property delivered to.

UK Comparison: This is comparable to the data available with AFD Postcode Plus for the UK, although some countries may not have full delivery point data for all addresses.
